

Stat 145 (Multivariate Statistics)

Laboratory Exercise No. 3

INSTRUCTIONS: Answer the following as indicated.

Using the *penguins* data in the **palmerpenguins** package perform multivariate analysis of variance to determine if there exists significant differences among the species with respect to the following measurements: `bill_length_mm`, `bill_depth_mm`, `flipper_length_mm`, and `body_mass_g`. Perform all the necessary assumption checks and follow up analyses, whenever necessary. Document everything in your analysis in R Markdown. Read the package documentation to learn more about the data set.
